

ATTENTION

Please read before installation

All Sports & Performance Clutches & Flywheels

PLEASE ADVISE DRIVER OF VEHICLE:

Installing a sports & performance clutch to suit various vehicles, can transfer harmonic transmitted noises from the engine to the gearbox. This may also cause gearbox rattle. These transmitted noises will in no way effect the performance of the clutch or vehicle and is accepted in the performance industry where engine / clutch modifications have been carried out.

Reference cause, replacement of an Exedy Silent Design long travel clutch disc to a high torque center Exedy sports / performance clutch disc is generally the known cause of this transmitted noise.
